## Day 1 (Apr. 23<sup>rd</sup>, 2025)

### 8:30-9 – Coffee & Registration

### 9.00-9:45 - Welcome & Introduction (Dr. [Giacomo Orsini](#) and [Prof Robin Vandevooort](#))

### 9:45-11:15 - Keynote 1 ([Prof Adrian Favell](#)) - *Evaluating the Politics of Disintegration*

My recent book *The Integration Nation: Immigration and Colonial Power in Liberal Democracies* (Polity, 2022) offers a radical manifesto for decolonial disintegration — as the logical conclusion of a politics that challenges the order of racial capitalism and the extractive, exploitative dynamics of immigration it is built on. This, however, leads to uncomfortable questions for progressives about their accepted notion of pathways to inclusion and settlement for migrants, particularly for refugees who may never have the option of transnational return. My discussion will raise these questions for debate.

**Keynote 2 - [Prof Halleh Ghorashi](#)** - *The value of epistemic multiplicity to decolonize the dominant Dutch integration discourse*

In my keynote I will show the colonial legacy and nationalistic foundation of Dutch integration policy and discourse. I begin by discussing the integration discourse's implications for research and the exclusionary practices towards researchers of colour in Dutch academia. I argue for the importance of epistemic multiplicity and, in particular, the insider-outsider position of marginalized communities and scholars of colour as essential forms of knowledge to decolonize integration discourse, policy, and research. I argue the importance of such knowledge to unravel the normalized colonial foundation of the dominant integration discourse and contributes to decolonizing its implications by doing migration research through co-production of knowledge in practice.
